

RICOH Streamline NX

Take your information
management to the NX level

"31% of respondents cite the cost of purchasing and maintaining on-premise print servers as one of the top print management challenges."

Quocirca, Cloud Print Services Landscape 2025

Managing print and device environments across multiple locations can be complex and costly. Traditional approaches don't scale but RICOH Streamline NX does.

Our unified platform simplifies fleet management, print workflows and device monitoring giving you full control and a consistent user experience across all devices.

Centralise your fleet management with RICOH Streamline NX

Enterprise setup

Deploy and standardise your fleet with ease. Automated device discovery and batch configuration save time, while multi-brand support means you manage everything from one console. Templates let you replicate settings across devices quickly so integration is fast and effortless.

Security and control

Protect sensitive data without slowing your teams down. Advanced authentication options including FIDO2 passwordless login, smart cards and QR codes make access secure yet simple. Features like secure release printing and compliance tracking help you stay in control and meet regulatory requirements.

Ongoing device management

Keep your devices performing at their best. Real-time monitoring gives you visibility of status, toner and paper levels, while remote updates and firmware management reduce on-site visits. Predictive maintenance alerts help prevent downtime before it happens, keeping your business moving.

Advanced capabilities for modern workflows

User access and experience

Workflows should feel effortless. RICOH Streamline NX offers an intuitive interface with clear icons and a simple task log, so users can get things done without training. Single sign-on and flexible authentication options including smart cards and QR codes make access quick and secure, reducing friction across your organisation.

Mobile support

With the RICOH Streamline NX app available on iOS, Android and macOS, users can print, scan and route documents securely from anywhere. The Work from Home Client feature provides visibility and control for remote devices, tracking usage and supplies to keep productivity high even outside the office.

Print data security

Protect every print job from start to finish. End-to-end encryption and hold/release options ensure sensitive documents stay secure until authorised users retrieve them. This reduces risk and supports compliance without slowing down your business.

Administration and reporting

Turn data into decisions. RICOH Streamline NX provides detailed reports on usage, costs and security compliance, helping you manage budgets and optimise resources. Export data easily for analysis and share insights across teams to improve accountability and planning.

Scan and capture

Digitise documents with confidence. High-accuracy OCR (99.8%) converts paper into searchable, editable formats like PDF, Microsoft Word and Excel. Direct integration with platforms such as SharePoint, Google Drive and OneDrive makes sharing seamless. Advanced features like zonal OCR and barcode recognition enable automated workflows for faster processing.
